OBJECTIVE

A software engineer with 8 years of development experiences, a passion for Web and JS development. I am able to work on the development of software systems by accurately interpretinguser requirements, then creating the required software designs, coding and testing them and finallyintegrating the software. Also, I am keen to learn more about modern software development techniques,methods, tools, and languages to adapt to the future of software development. I am continually evaluatingand upgrading my skills so that I can stay at the cutting edge of Web/Software development. Self-motivated, hard working, enjoy new technologies and new challenging jobs.

SKILLS

DB Management: MySQL. NoSQL (mongodb)
OS: Window , Linux (Ubuntu/Centos), MacOS
Source Code Management: Git.
Back-end side: PHP, NodeJS(Sails/Express/Node), .NET Core, Laravel.
Front-end side: HTML, CSS/SCSS, Bootstrap, Jquery, AJAX, VueJS, React, React-Native, NuxtJS, Angular.
Distributed system: Redis, Elastic Search.
Web server: Nginx, Apache2.
Container: Docker.
AWS: S3 (Simple storage service), EC2.
Other skills: Responsive web application, Web Service (Restful), Single Page Application, WordPress, ES6, Gitlab CI/ CD, Swagger, DigitalOcean, Laravel, AI implements

WORK EXPERIENCE

◆ Zlabs   Feb 2023 - Feb 2025

Full-stack Developer & Technical Leader

- Adapt Performance, improve website for fast and friendly.
- Researched technology.
- Conducted code reviews, improved code quality through testing, and mentored junior developers.
- Optimized Performance: Reduced backend response times by 35% by implementing advanced caching and query optimization techniques.

◆ VLINKGROUP   Mar 2021 - Dec 2023

Technical Leader

- As a full-stack developer, I'm cover every something.
- Build the website in Vue/Angular framework.
- Build Backend in .NetCore, PHP(Laravel FW), NodeJS(SaildJS/Express)
- Manage VPS (config webserver, setup cache, setup CI/CD, backup data).
- Cross-Platform Integration: Collaborated with mobile teams to enhance integration and functionality in React Native, leading to a 20% increase in user engagement.
- Security Enhancements: Implemented role-based access control, data encryption, and secure authentication, ensuring.
- Researched technology.

◆ VLINKGROUP   Oct 2019 - Dec 2019

Full-stack Developer

- Managed a small UI team to handle development workflow, review code and deployment the website to clients.
- Develop, improve internal product.
- Developed real-time features such as live notifications and chat functionalities using WebSockets.
- Technologies: .NET Core, Vuejs, NuxtJS, Wordpress, Redis, NodeJs, MySQL, Gitlab CI/CD.
- Conducted code reviews, improved code quality through testing, and mentored junior developers.

◆ **BookVillage**   Oct 2019 - Nov 2021

Full-stack Developer

- A Product like as chotot.com for buy secondhand.
- Developed and maintained backend services using Sails.js and Node.js, handling 10k API requests daily and optimizing response time.
- Created cross-platform mobile applications with React Native (https://bookvillage.app/).
- Implemented secure user authentication, data encryption, and role-based access control (JWT).
- Using React-Native for build App and NodeJS, Redis, AWS for server-side.

◆ **Smartdev LLC**   May 2019 - Nov 2019

PHP Developer

- Developed and maintained scalable applications using Laravel and Vue.js, achieving (reducing page load time by 30%).
- Collaborated with cross-functional teams, including designers and front-end developers, to enhance functionality and UX.
- Designed and optimized RESTful APIs for seamless integration with front-end applications and mobile apps(http://kitchenpalapp.com/).
- Applied best practices for security and data protection, implemented authentication mechanisms, and managed permissions (OAuth2).

◆ **DIGITAL SHIP**   June 2018 - May 2019

PHP Developer

- Convert PSD to HTML using Bootstrap, Scss, Responsive and optimize images, CSS, JS.
- Coding follow W3C standard.
- Maintain appsand improve the Web application performance.
- Researched technology to apply in a new project.
- Knowledge about server Linux, install and settingApache, PHP, MySql, Git, etc.
- Used Postman and Swagger to manage RESTFUL APIs.
